

I am a listener of XM Satellite Radio and urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming not available from local broadcast radio channels.

I feel you should let the public decide what they want to listen to either AM/FM radio or Satellite Radio and programming like local traffic and weather channels that provide me with timely traffic conditions and weather information.

Local radio and satellite radio should be considered as another form of competition in the market.

Thank you.
